Abu Dhabi Sewerage Services Company

Energy Management Policy

Serial. No:	EnMSP-001	Version No:	003	Effective Date:	Apr 2022
-------------	-----------	-------------	-----	-----------------	----------

ADSSC is a governmental entity serving customers throughout the Emirate of Abu Dhabi. ADSSC aims to provide high quality, safe and environmentally friendly wastewater services. Our core business being collection, treatment and disposal of end products. ADSSC is wholly owned by Abu Dhabi Development Holding Company, the Abu Dhabi Government company mandated to own, oversee and operate development-related state-owned enterprises in various sectors and ADSSC reports to the Department of Energy (DoE).

This energy policy has been drafted in compliance with ISO 50001:2018 and is the driver for implementing and improving ADSSC's Energy Management System (EnMS) and energy performance within its scope and boundaries. ADSSC aims to provide high quality, safe and environmentally friendly wastewater services to its customers throughout the Emirate of Abu Dhabi. ADSSC is committed to the efficient, effective and economical management of its energy resources and continual improvement across its business operations.

ADSSC is committed to:

- Providing necessary resources and support for implementing improvements and achieving energy management objectives and targets through its Energy Management Team
- Continually assessing and reviewing energy performance by measuring, monitoring, quantifying, analysing key and appropriate data in comparison to identified baseline(s)
- Continually improve energy performance (i.e. use and consumption) by developing and reviewing energy objectives, targets and relevant Energy Performance Indicators (EnPI's)
- Supporting the purchase of energy-efficient products and services, ensuring design for energy performance improvement
- Fostering an Energy Management culture across the organisation by increasing knowledge and awareness, providing trainings for all relevant staff, communicating with relevant stakeholders
- Taking all efforts to adhere to the applicable legal and other requirements related to energy use, consumption and management
- Developing benchmarks and seeking best practices in the field of energy management
- Reviewing and updating the policy as and when deemed necessary, ensuring its availability to staff and stakeholders
